HERMIT LABS

ABOUT US

Hermit Labs is an Industrial Internet of Things(IIoT) startup that integrates smart **device systems**, machine learning and AI-based **analytics** to continuously monitor asset and infrastructure condition and enable **predictive maintenance**.

We are helping industries to optimize their resource utilization

We employ real-time predictive maintenance and asset monitoring to enhance productivity between man and machine.

HERMIT LABS

MISSION

Our mission is to help industries grow through real-time data fusion and analytics turn their data into quality-increasing and cost-saving actions.

VISION

Our vision is to be a worldwide market leader in end-to-end Industrial IoT and predictive maintenance solutions.

WHO WE ARE

TANMAY
MOHARANA

ASHIRBAD
SAMANTARAY

PARTNERSHIPS IN PRACTICE

SUPPORTED BY

OUR APPROACH

MEASURE: We help our customers measure exactly the data they need.

CONNECT: We combine the pre-processed data with relevant information from other data sources (data fusion) to enable even more detailed predictions.

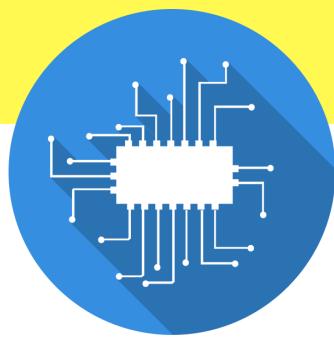

ANALYSE: We use artificial intelligence to analyze your data and help you find out if your assets are healthy or if and when you need to schedule maintenance actions.

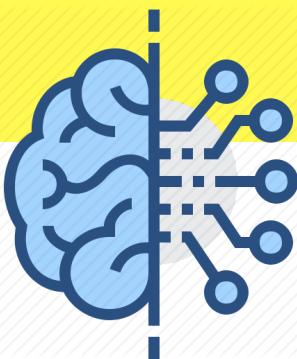

ACT : We provide you with a user-friendly platform to visualize your assets' needs and recommend courses of action

WHAT WE OFFER

DATA COLLECTION

- Custom-built sensor stack to collect the data you need
- Usage of advanced protocols to enhance security and connectivity

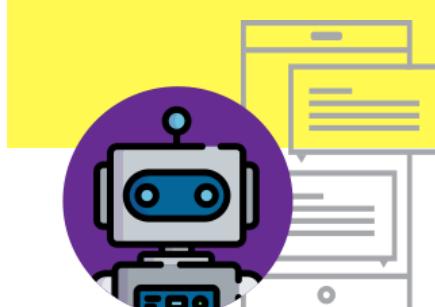

DATA ANALYTICS

- Artificial Intelligence and Machine Learning based models
- Provision of actionable insights enabling meaningful actions.

DATA INTERACTION

- Intuitive dashboard to make sense of the data.
- Real time data visualization.
- Dashboard allows for quick and effective action to be taken.

CHATBOTS

- Our Chatbots become an effective bridge between you and your customers.

Operation Hours

In MineStat - Our mining analytics platform, collected data can be used to visualize real-time machine condition and performance and, with relevant data history, feed powerful predictive analytics, forecasting production bottlenecks and projecting preventive maintenance measures.

HERMIT LABS

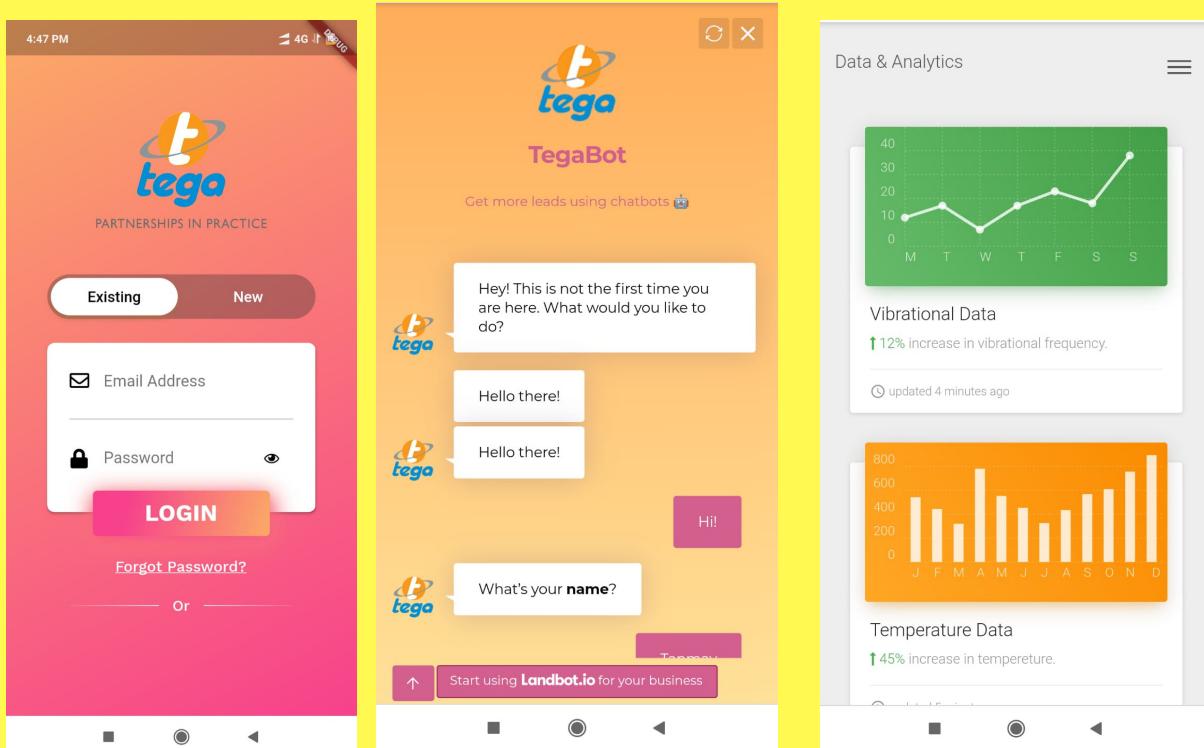

PRODUCTS

MineSense - Our sensor package, helps in collecting essential data for measuring and analysing machine condition and performance , which helps in measuring performance and health of the machines or assets.

HERMIT LABS

PRODUCTS

MineSense App & Chatbot - Our mobile apps and chatbots, help customers interact with the processed information in a better way and derive an insight for better efficiency and productivity.

IN NEWS

At the SAXEED event

Hermit Labs is one of the incubated teams at the Freiberg Innovation Incubator, Freiberg, Germany

EIT Jumpstarter Program

Hermit Labs is one of the few teams in Europe competing for the prestigious EIT Jumpstarter Program

SAXON Founder Award

Hermit Labs nominated for prestigious SAXON Founder Award
